

TUNA MASTERS 2021 PANDEMIC RULES

26-08-2021

According to last developments, the pandemic oriented regulations for both Tuna Masters Teos & Alaçatı have been defined. Each tournament not being exactly the same, the Alaçatı one will comply to the new regulations expected for September 6 th . The new general regulations will be so far as follows.

Tuna Masters Teos September 2nd - 5th 2021

- 1) Wearing a mask within the tournament area is mandatory.
- 2) Although the tournament area will be open to the public in a controlled way, only badge wearing visitors will be allowed. Accordingly, each boat (team) will be given four (4) extra guest badge cards at the time of registration. Please use these card/badges for your guests.
- 3) As it was for the past year, this year also will be void of a Gala Dinner, and the caught fish will be let and handed to their respective owners. The same agreement has been settled with Serif Balıkçılık. Cutting and Packaging will be carried out and charged for at 300.-TL per fish. Otherwise, if the teams become responsible for the dressing, cleaning, and storing of their own catch, it is requested that such operations shall be carried out outside the marina and care shall be taken not to do it in public and not under sight whatsoever. Again, any fish leftovers such as heads, tails, fins, and offal shall be carefully bagged and disposed of in the appropriate trash bins or containers.
- 4) In the same way it was for the past year, there will be an extra Health Disclaimer to be signed in addition to the usual General Disclaimer.
- 5) As all operations within the tournament will need to be exercised under the “safe distance” concept, we importantly beg you to avoid crowded movements such as garments or goods distribution, payments and similar. Therefore, please accomplish all those as early as possible before the tournament.
- 6) Again because of the “safe distancing” philosophy, Tournament Rules and Program will not be distributed in printed form. We kindly and importantly request you to follow and even download those issues and arguments on or from our website where they are displayed in detail.

Tuna Masters Alaçatı September 9th – 12th 2021

All regulations applied to and effective for Tuna Masters Teos will also be valid for Alaçatı, with the addition of the following. Also, the same fish packaging service will be offered at the same conditions, but this time by Okan Balıkçılık.

All pandemic regulations effective as of September 6 th for all and any activities, will be as well effective for this tournament. A “HES Code” check will be done at the entrance, and individuals (contestants, sponsors, personel and visiting guests included) will be accepted-in accordingly. Individuals which have not completed their vaccinations will be required to produce a PCR Test document not exceeding 48

hours. Accordingly, the tournament area will be open to all individuals complying to all previous prerequisites, and separate visitors' cards or badges such as in Teos will not be neither necessary nor distributed. Wearing a mask within tournament area will be mandatory.

Even if these seemingly antipathetic pandemic rules that have been implemented to protect both yourselves as well as ourselves are quite restrictive, we believe it is the right way to go.

Whilst keeping the fishing excitement high and granting first thought to the tournament teams, we believe that you will agree that it is the least Healthwise risky approach.

We are kindly requesting you to read and understand the above-mentioned rules with serious attention and do your best to comply with them. We also believe that our fishing buddies of all these past years will give a sensitive good example of teamwork in that respect.
